RED LINE = bleed
BLACK LINE = finished page size / cut line
MAGENTA LINE = safety margins

Inside - PHOTOGOLD 20,5x29 - v7

page: minimum 32 - maximum 250

All books must have an even number of pages. This is the first page that will appear on the right when you open the book, while the last page will be on the left before the cover.
The pages must be added two at a time, so as to keep an even number of inside pages. In no case is it necessary to leave pages blank at the end of the book.

Please note: all relevant content (text and images that do not extend to the edge of the page) must be positioned inside the grey area enclosed by the MAGENTA LINE (safety margins). All content outside this area could be positioned too close to the cut or be hidden by the binding. If you do wish for your images to be printed near the edge of the sheet, you must drag them to the RED LINE (bleed), so as to create an expendable bleed space between the BLACK LINE (page cut) and the red line (bleed).

COLOUR PROFILE
The reference profile for all our laboratory's prints is sRGB. The sRGB colour profile must be used as working space in all the applications that allow for it (Photoshop, Lightroom, InDesign…) for perfect correspondence between (calibrated) monitor display and printer.
